

Varonis to Showcase Latest Products and Host Presentations on Data-Centric Security at Infosecurity Europe 2018

May 29, 2018

LONDON, May 29, 2018 (GLOBE NEWSWIRE) -- [Varonis Systems, Inc.](#) (NASDAQ:VRNS), a pioneer in data security and analytics, will showcase its Data Security Platform, a fully integrated solution focused on protecting enterprise data stored on-premises and in the cloud, at Infosecurity Europe 2018, June 5 - 7. Varonis invites attendees to Stand E90 for product demonstrations and a full programme of presentations, including guest presenter Troy Hunt, and more.

Visitors can see the latest products and features built on the Varonis [Data Security Platform](#), which is used by thousands of organisations to monitor file activity and user behaviour, prevent data breaches, and manage permissions across file and email systems. [Varonis Edge](#), which is new to the platform, extends data security from the core to the perimeter by analysing devices such as DNS, VPN, and web proxies to detect security events, such as brute-force attacks, DNS tunnelling and credential stuffing.

Varonis Highlights at Infosecurity Europe 2018:

- **Visit Varonis:** The team will be running daily presentations on Stand E90. Stop by and learn how Varonis helps organisations around the world track and protect their data, both on-premise and in the cloud.
- **Technology Demos:** See a demo and learn how Varonis protects customers' most valuable – and vulnerable – data from attacks from the inside out: eliminating repetitive, manual clean-up projects by automating data protection routines.
- **Keynote:** Leading security researcher and Varonis content partner, Troy Hunt, will deliver a keynote presentation on “The Modern State of Insecurity,” on Wednesday 6 June, at 14:35-15:10. The presentation will explore how threats are evolving and which are the ones we need to be especially conscious of in the modern era.
- **Presentation:** On Tuesday 5 June at 12:00 - 12:25 and Wednesday 6 June at 12:40 - 13:05, at the Technology Showcase theatre, hear Varonis' Matt Lock present “Turtles, Trust and the Future of Cybersecurity.” Learn how a data-centric security approach can reduce risk, increase efficiency and re-engineer trust in a society where faith has been shaken by breaches.
- **Presentation:** On Wednesday 6 June at 13:20 - 13:45, Ofer Shezaf, Director of Cybersecurity, Varonis, will present a Tech Talk on the Anatomy of VPN Hacks: Is 2FA Enough? This presentation describes a comprehensive study of VPN hacks on the Ukrainian power grid, Yahoo, Ashley Madison, and others and uses these to understand when 2FA works and when it falls short.

Not attending Infosecurity Europe? [Sign up](#) for a free Data Risk Assessment.

About Varonis

[Varonis](#) is a pioneer in data security and analytics, fighting a different battle than conventional cybersecurity companies. Varonis focuses on protecting enterprise data: sensitive files and emails; confidential customer, patient and employee data; financial records; strategic and product plans; and other intellectual property. The Varonis Data Security Platform detects insider threats and cyberattacks by analyzing data, account activity and user behavior; prevents and limits disaster by locking down sensitive and stale data; and efficiently sustains a secure state with automation. With a focus on data security, Varonis serves a variety of use cases including governance, compliance, classification, and threat analytics. Varonis started operations in 2005 and, as of March 31, 2018, had approximately 6,000 customers worldwide — comprised of industry leaders in many sectors including financial services, healthcare, public, industrial, insurance, energy and utilities, consumer and retail, education, media and entertainment and technology.
