Varonis Showcases Latest Products for Lightning Fast Security Investigations at Black Hat USA 2018

August 1, 2018

NEW YORK, Aug. 01, 2018 (GLOBE NEWSWIRE) -- Varonis Systems, Inc. (NASDAQ:VRNS), a pioneer in data security and analytics, will be exhibiting at Black Hat USA 2018 on August 8-9 in Las Vegas, NV.

Varonis invites Black Hat attendees to visit booth #358 for product demonstrations, presentations, and more. Black Hat attendees will get an up close look at the latest features and enhancements to the VaronisData Security Platform, which locks down sensitive enterprise data, monitors user behavior, and prevents data leaks across hybrid on-premises and cloud data storage environments.

Varonis Highlights at Black Hat USA 2018:

- **Visit Varonis:** During expo hours, head to booth #358 for a presentation on how Varonis helps thousands of organizations around the world detect insider threats and cyberattacks, prevents and limits disaster by locking down sensitive and stale data, and efficiently sustains a secure state with automation.
- **Technology Demos:** Learn how to run a security investigation using Varonis Edge, which uses metadata from technologies like DNS, VPN, and web proxies to spot signs of attack at the perimeter. Varonis puts perimeter activity in context with a user's core data access activity, geolocation, and security group memberships -- resulting in more meaningful alerts.
- **Not attending Black Hat?** You can still see a demo and learn how Varonis protects data on-premises and in the cloud. Sign up for a demo or your own Data Risk Assessment.

About Varonis

Varonis is a pioneer in data security and analytics, fighting a different battle than conventional cybersecurity companies. Varonis focuses on protecting enterprise data: sensitive files and emails; confidential customer, patient and employee data; financial records; strategic and product plans; and other intellectual property. The Varonis Data Security Platform detects insider threats and cyberattacks by analyzing data, account activity and user behavior; prevents and limits disaster by locking down sensitive and stale data; and efficiently sustains a secure state with automation. With a focus on data security, Varonis serves a variety of use cases, including governance, compliance, classification and threat analytics. Varonis started operations in 2005 and, as of June 30, 2018, had approximately 6,200 customers worldwide — comprised of industry leaders in many sectors including financial services, healthcare, public, industrial, insurance, energy and utilities, consumer and retail, education, media and entertainment and technology.
