

Varonis Celebrates 10-Year Anniversary of First UK Location, Settles into New Office

August 7, 2018

NEW YORK and LONDON, Aug. 07, 2018 (GLOBE NEWSWIRE) -- [Varonis Systems, Inc.](http://www.varonis.com) (NASDAQ:VRNS), a pioneer in data security and analytics, today announced the 10-year anniversary of the opening of its first office in London in 2008. The news follows the company's recent expansion in the UK and move to a new office in Finsbury Square, in the heart of London.

The 10-year milestone and London office move follows a year of success and growth for Varonis across Europe: In 2017, Varonis opened a new office in Germany, and its operations in France celebrated ten years in business and expansion into a new office.

Commenting on the milestone, Varonis UK VP and Country Manager Andy Richmond said, "Ten years ago, companies put their faith in firewalls and antivirus tools to protect themselves from cyber threats. Data was often an afterthought. Today, breaches are all too common, and the GDPR is bringing sweeping changes requiring organizations to prioritize and protect their data. We're pleased to be marking ten years in London and looking forward to helping companies secure their critical information."

Companies rely on Varonis to provide visibility into file and email systems and detect any harmful or abnormal behavior to help prevent data breaches, cyberattacks, and other security threats.

Varonis enables organizations to discover, monitor and lock down their sensitive data, which is becoming increasingly important with the EU General Data Protection Regulation (GDPR).

About Varonis

[Varonis](#) is a pioneer in data security and analytics, fighting a different battle than conventional cybersecurity companies. Varonis focuses on protecting enterprise data: sensitive files and emails; confidential customer, patient and employee data; financial records; strategic and product plans; and other intellectual property. The Varonis Data Security Platform detects insider threats and cyberattacks by analyzing data, account activity and user behavior; prevents and limits disaster by locking down sensitive and stale data; and efficiently sustains a secure state with automation. With a focus on data security, Varonis serves a variety of use cases including governance, compliance, classification, and threat analytics. Varonis started operations in 2005 and, as of June 30, 2018, had approximately 6,200 customers worldwide — comprised of industry leaders in many sectors including financial services, healthcare, public, industrial, insurance, energy and utilities, consumer and retail, education, media and entertainment and technology.
