Varonis Showcases Latest Products to Protect Data Security at IP Expo Manchester

LONDON, April 24, 2018 (GLOBE NEWSWIRE) -- Varonis Systems, Inc. (NASDAQ:VRNS), a pioneer in data security and analytics, will showcase its latest products that monitor how data is used, stop malicious behaviour in its tracks and lock down sensitive information to a least-privilege model at IP Expo Manchester, April 25 - 26.

At stand R514, visitors can see the latest products and features built on the Varonis Data Security Platform, including Varonis Edge, which extends data security from the core to the perimeter by analyzing devices such as DNS, VPN, and web proxies to detect security events, such as brute-force attacks, DNS tunnelling and credential stuffing. Attendees can see a demo of Varonis' GDPR Patterns, which helps organizations discover regulated personal data and generate reports including permissions, open access, and stale data. These patterns and classifications can help enterprises comply with GDPR by building out security policy to monitor and alert on GDPR-affected data.

Varonis Highlights at IP Expo 2018:

- **Session:** On Wednesday April 25 at 11.00 - 11.30am, in the Cyber Threat Intelligence Theatre, hear Varonis' Tom Rossdale present "Turtles, Trust and the Future of Cybersecurity." Learn how a data-centric security approach can reduce risk, increase efficiency and re-engineer trust in a society where faith has been shaken by breaches.
- **Technology Demos:** During expo hours, Varonis will be exhibiting at stand R514. Learn how Varonis protects customers' most valuable — and vulnerable — data from attacks from the inside out: eliminating repetitive, manual clean-up projects by automating data protection routines. See a demo and learn how Varonis protects data residing both on-premises and in the cloud. Not attending IP Expo? Sign up for a free Data Risk Assessment.

About Varonis

Varonis is a pioneer in data security and analytics, fighting a different battle than conventional cybersecurity companies. Varonis focuses on protecting enterprise data: sensitive files and emails; confidential customer, patient and employee data; financial records; strategic and product plans; and other intellectual property. The Varonis Data Security Platform detects insider threats and cyberattacks by analyzing data, account activity and user behavior; prevents and limits disaster by locking down sensitive and stale data; and efficiently sustains a secure state with automation. With a focus on data security, Varonis serves a variety of use cases, including governance, compliance, classification and threat analytics. Varonis started operations in 2005 and now has thousands of customers worldwide — comprised of industry leaders in many sectors including technology, consumer, retail, financial services, healthcare, manufacturing, energy, media, and education.
